DC INVERTER ROOFTOP PACKAGED AIR CONDITIONERS

(GC202010-I)

CAPACITY RANGE: 22.0~105.0kW (75100~358300Btu/h)

OPERATION RANGE: COOLING: 18~52°C

HEATING: -10~24°C

GREE ELECTRIC APPLIANCES, INC. OF ZHUHAI

3 PRODUCT FEATURES

3.1 Description

The Gree Rooftop C series are completely assembled, piped and wired at the factory to provide one-piece shipment and rigging. Each unit is pressurized with a holding charge of refrigerant-410A for storage and shipping. The Gree Rooftop C series can offer the perfect combination of superior product quality, high operating efficiency and cost efficiency. The compact design, outstanding anti-corrosive cabinet and quiet operation make these units suitable for both light commercial and residential applications. From dedicated design of each part to the unit assembling, together with complete test, the unit offers reliable operation and comfort experience. Comprehensive protections can guarantee the system safety and prevent damage of critical components such as compressor under harsh working conditions. All sheet metal parts are constructed of commercial grade galvanized steel. The unit external parts are coated with special paint to ensure anti-corrosion performance.

3.2 Features

3.2.1 High energy efficiency and performance

◆ DC inverter design

The Gree Rooftop unit meets CB requirements. The compressor and outdoor fan can adjust the operating frequency according to different room loads, and automatically adjust the capacity output to ensure the comfort of the room environment. At the same time, the power consumption of the unit changes along with the capacity output and the power consumption of unit is low in low-load operation. Compared with the fixed-speed unit, its annual power consumption is lower, which is high-efficiency and power-saving.

◆ DC inverter motor

The outdoor heat exchanger applies DC inverter motor with high back electromotive force. Power input of motor is lower and operating current is smaller, thus the efficiency is greatly improved compared with the AC motor.

◆ High efficiency fan blade

New high-efficiency fan blade design adopts CFD simulation technology to optimize the matching of blade type and blade angle. In addition to the special trail edge design, the working area of blade is effectively increased and the air volume is greatly increased.

3.2.2 High reliability

- ◆ Excellent grid adaptability

The Gree Rooftop C series adopts anti-grid fluctuations design, performs stably in ultra wide voltage range from 342V to 456V, which is perfectly adapted to the power grid fluctuation during peak hours or other conditions.

- ◆ Multiple protection design

The Gree Rooftop C series unit is designed with high voltage protection, low voltage protection, over-current protection, discharge protection, phase sequence protection and other protections. It can effectively protect key components such as compressor and motor in abnormal operation and harsh working conditions, extending the service life of the unit and ensuring safer and more reliable operation.

- ◆ Automatic adjustment of throttling

The Gree Rooftop C series unit adopts throttling of electronic expansion valve, and automatically adjusts the opening degree in throttling according to the system high pressure and discharge temperature. It makes sure that the system parameters are within a reasonable range when the unit operates under all working conditions, to improve the operation reliability and service life of the unit.

Anti-crossflow design of outdoor fan

The outdoor fan of the Gree Rooftop C series unit adopts Anti-crossflow startup design to solve the problem that the unit cannot start smoothly in the reverse operation under the high wind environment. The Anti-crossflow startup design allows the unit to fully adapt to the harsh windy environment and start reliably. The outdoor fan runs smoothly, which is safer and more reliable.

3.2.3 Anti-corrosive and dustproof

- ◆ Weather fastness fan blade

The fan blades of the condenser fan are directly injection molded with ABS+glass fiber material, which has excellent weather fastness and anti-corrosive performance.

3.2.4 Easy to use

- ◆ Non-polarity communication design

The Gree Rooftop C series unit adopts two-core Non-polarity communication. System anti-electromagnetic interference capability is strong, and the communication distance between the wired controller and the unit can reach 100m. The field wiring does not need to distinguish the positive and negative poles. Meanwhile, conventional communication wire and telephone wire can be adopted, with no need of special shielded communication wire.

- ◆ Auxiliary controller

The Gree Rooftop C series unit can be connected to centralized controller. One centralized controller can control up to 36 units, and realize single unit control or group control for multiple units. It can also be used with MODBUS gateway to remotely control the unit, or to be managed with other electrical equipment in the building.

③ Communication Cord

ROOFTOP PACKAGED AIR CONDITIONERS

10.1 Specification of Power Supply Wire and Circuit Breaker

Model name	Power supply	Capability of circuit breaker (A)	Min. sectional area of earth wire(mm ²)	Min. sectional area of power cord(mm ²)
GK-H5.5TH/NaA-X(L)	380-415V 3N~,50/60Hz	25	2.5	2.5
GK-H6.2TH/NaA-X(L)	380-415V 3N~,50/60Hz	25	2.5	2.5
GK-H7.5TH/NaA-X(L)	380-415V 3N~,50/60Hz	32	4.0	4.0
GK-H10TH/NaA-X(L)	380-415V 3N~,50/60Hz	32	4.0	4.0
GK-H15TH/NaA-M(L)	380-415V 3N~,50Hz	63	10.0	10.0
GK-H20TH/NaA-M(L)	380-415V 3N~,50Hz	63	10.0	10.0
GK-H25TH/NaA-M(L)	380-415V 3N~,50Hz	80	16.0	25.0
GK-C30TH/NaA-M(L)	380-415V 3N~,50Hz	80	16.0	25.0

Notice:

- ◆ An all-pole disconnection switch having a contact separation of at least 3mm in all poles should be connected in fixed wiring.
- ◆ The circuit breaker and power cord specification in above sheet is based on max power (max current) of the unit.
- ◆ The power cord specification in above sheet is based on ambient temperature of 40°C.
- ◆ If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.
- ◆ The circuit breaker specification in above sheet is based on ambient temperature of 40°C. If the working condition is different, please adjust it according to the specification sheet of circuit breaker.

11 ACCESSORIES

Part Name	Model	Product Code	Model	
			GK-H5.5TH/NaA-X(L), GK-H6.2TH/NaA-X(L), GK-H7.5TH/NaA-X(L), GK-H10TH/NaA-X(L), GK-H15TH/NaA-M(L), GK-H20TH/NaA-M(L), GK-H25TH/NaA-M(L), GK-C30TH/NaA-M(L)	
Wired Controller	XK117	MC20700730		●
Central controller with Weekly Timer	CE52-24/F(C)	MC207052		○
Electric heating	GKRd36/A-X	EN02000070		○
Dry contact gateway	ME30-42/E1	NC20000020		○
Wireless Remote Controller	YB1FA	/		○
Modbus Gateway	XK117	/		○

Note:

- ◆ “●”means standard, “○”means optional, Electric heating is only suitable for 30Ton.
- ◆ Gree reserves the right to modify the specifications without prior notice. Please confirm the final specifications with sales representative.

Note:

Gree is committed to continuously improving its products to ensure the highest quality and reliability standards, and to meet local regulations and market requirements.

All features and specifications are subject to change without prior notice.
